Re: Consent Agreement (VII-92-H-008 and VII-93-T-499-E)
Progress Report, May 1, thru July 31, 1998

Dear Mr. Gresham:

This report is submitted pursuant to paragraph 8 of the first modification to consolidated consent agreement and order, as referenced above.

1. The E-Coat System and topcoat booths at the new facility are operating three shifts per day, five to six days per week.
2. Emissions of volatile organic compounds from the new facility totaled 16.8 tons during this reporting period.
3. The revised Remedial Action Plan (RAP) for the West Quincy, MO facility was approved by MDNR on July 21, 1998. The RAP was revised in response to MDNR comments dated March 26 and June 24, 1998. We intend to complete the RAP Phase I scope of work, through Schreiber & Yonley Associates, as outlined in the approved plan.

If you have any questions, please call me at 217-222-7131.

Sincerely,

The Knapheide Manufacturing Company

Bernie Ott
Environmental Engineer
